
The function of a external website is damaged

Posted by newglobes - 2011/12/13 20:43

Hello, I'm giving a link to an external site.

the External site is eBay fees calculator

When you access the external site and type in any number, the calculator starts immediately and the calculates auto run the outcome.

When I use Sexy Lightbox and links to the external site, if you type a number, nothing happens, the calculator does not work,

I'd love to get help,

Thank you

Asaf

PS

I'm using Joomla 1.7

The external site

<http://www.rolbe.com/ebay.htm>

my site

<http://www.ebayguide.co.il/>

Hello,

It is not an extension issue, this problem with calculator javascript code. It can't work when it loads into (or) element. A security error occurs, you can see it in browser's javascript error console.

For example you can add the next HTML code to an article and make sure it doesn't work:

Regards,
ARI Soft
