Posted by terryzzz - 2011/12/22 14:15

Hi There,

Sorry to be so painfully new at all of this.

If I purchase ARI Sexy Lightbox, how many websites can I use it on with the one purchase? Or do I have to purchase a new one for each website?

Cheers
Tez

Hello,

The extension is under GNU GPL license and can be used on any number of sites.

Regards,
ARI Soft

Hi,

Sorry to bother you again. I bought the software, but I am very new to Joomla and I've been struggling all day to set up the galleries as per the instructions I have found on your forum. There doesn't seem to be any other documentation to assist me so here I am.

I have installed arisexylightbox as per the readme instructions. I can get it to display a single popup from a pic as the documentation indicates using,

but setting up a gallery from a folder seems to be a whole different issue.

I followed these instructions I found in the forum:

It's easy. Choose 'Image gallery' in 'Choose type' drop-down, specify thumbnail size with help 'Thumbnail width' or 'Thumbnail height' parameters, type path to folder with images in 'Directories' textarea, assign module to necessary position and save the module. After this the module should display images from selected folder.

...and all I get is:

{EmptyText}

...instead of a gallery.

I have set the module to load with 'load module into article' into my photo article.

I understand that I am supposed to be able to put code directly into the article to load the component. (I think I am getting confused between the module and the component at times), but I don't know what the correct code is?

Sorry to be so thick, but I could really do with your help.

Thanks

=====

Documentation can be found on module/plugins settings page. Click by "Detailed help here" link:

http://www.ari-soft.com/images/fbfiles/images/lightbox_documentation-48518cedd373001836e3dd7f08f59248.jpg

Is possible to provide a link to a page where you try to load an image gallery and provide temporary access to your J! backend by email so we can investigate an issue?

Thank you for your quick reply. I didn't know that the documentation on the module page is different to the plugin page. I will read this first and then back to you.

Thanks

Its amazing what you can do if you read the right documentation. It is going now (much simpler than I first thought!).

My only question is, how do I remove the table border on the gallery?Is that a CSS function?

Thanks again.

The module doesn't add border to a table. Probably it is defined in site template styles. Is is possible to provide a link to a page where we can see a gallery with a bordered table?

You're right... it was in my template css. Fixed now thank you.

I seem to have lost my mouseover border on the thumbnails. I have been playing around an awful lot trying to get everything going so I've probably stopped it somehow.

The site is www.sarahwarrenband.co.uk ...Please go easy on me. This is my first ever Joomla site and only my second ever website so I've been doing it all badly I think. LOL

Can I be rude enough to make a product suggestion? It would be nice if clicking on the picture within the lightbox advanced to 'Next' picture. I seem to be constantly chasing the 'Next' button around, and as the centred picture always stays in the middle, it would be easier to click there. Perhaps a turn on or off feature in the module. What do you think?

Cheers

It seems the extension is configured incorrectly. Open plugin(s)/module settings page (for all enabled sexy lightbox plugins), set "Include jQuery" parameter to "Yes" and re-save settings in any case (event if "Included jQuery" parameter is set to "Yes").

About navigation buttons, do you want to show it in fixed position?

Regards,
ARI Soft

Re:Licence

Posted by terryzzz - 2011/12/23 09:28

Jquery was set to yes. I've done something else and I have no idea....lol.

With regards to the 'Next' button. Either fixed... or as I suggested... be able to click on the centre of the picture to advance. I know this won't work for video or html documents, but just for image galleries that you might wish to click through quickly?

Cheers

Okay... fixed the thumbnail border issue... it only appears in Simple gallery 'Fancy' mode :)

Thank you for your suggestion about navigation. We will think about implementation of this feature in a future release.
