ARI Lightbox Module

Posted by KiddaMan - 2012/01/18 16:21

_____

When I save the module, my specified directories do not get saved, hence, no pictures are showing up.

Any Help ?

_____

Hello,

This problem can occur if "ARI Extensions" plugin is not installed or disabled.

Regards,
ARI Soft

Re:ARI Lightbox / Single Images for Multi folders

Posted by KiddaMan - 2012/01/18 16:58

_____

That's what it was.

Question: the extension is very thorough, and with lack of knowledge on my end and to save me some time.

I would like to be able to show single images for multiple folders in a joomla module for example, one image for boats, one image for bikes, one image for cars... then one clicked the pop-up lightbox would show only the images for that folder.

What would be the configuration to do that ?

Thanks for any assistance.

_____

Hello,

It possible to achieve this requirement if use a new module instance for each folder.

Regards,
ARI Soft
