
Jomsocial Login Lightbox

Posted by filipereis - 2012/01/22 21:19

Hi,

I just purchased lightbox and I have a concept question... I bought it so I can be able to create popups whenever a user wants to register in my website.

If user click on "Register" at SCLogin module (jomsocial module for login and registration) I want the lightbox to open.... How can I do that? do I need to write a CSS atribut in the module itself? can someone pls give me a light? :side: ??
Thanx!

Hello,

Could you provide a link to a page where we can see "Register" link?

Regards,
ARI Soft

"ARI Sexy Links" plugin can be used. Configure and enable the plugin and enter the next code in "Elements CSS selectors" parameter:

`".menu .item-302 A"|width=750&height=550&tmpl=component`

Thank you, worked perfect. got the point.

and what if I want to have a lightbox for a specfic item inside a module, for example:

I have SCLogin, inside it, I have a "Esqueceu a Senha?" item which I wanted to have a lightbox once client click on it.

Add the next code to "Elements CSS selectors" parameter:

"a"|width=750&height=550&tmpl=component

Regards,
ARI Soft
