
re: Warning: Missing argument 3 error on install

Posted by morrisoc - 2012/01/31 11:33

Hi,

I have just installed the various plugins as per your documentation, enabled then configured for what I require however on reloading the site I get the following message:

Warning: Missing argument 3 for AriLightboxAnywherePluginBase::onPrepareContent() in /home/*site*/public_html/plugins/system/arisexylightboxanywhere/kernel/Plugin/class.LightboxAnywherePlugin.php on line 32

If I disable the ..Anywhere plugin this error disappears. I have attempted to uninstall and then reinstall the plugin without success.

Any thoughts would be great as I am quite excited to get down to using your software! :)

Thanks.

Christian.

Joomla Version: 1.5.23

Hello,

Download extension's archive again please and upgrade "System - ARI Sexy Lightbox Anywhere".

Regards,
ARI Soft

Thanks for the reply. Ok so that got the plugin working however following your guide on displaying youtube videos is not working. I have placed the code {arisexylightbox moduleId="91"}{/arisexylightbox} at the start of the page and

```
{arisexylightbox activeType="rcontent" width="800" height="450" url="http://www.youtube.com/watch?v=WyA1dzfKywg" link="YouTube video" title="Video"}{/arisexylightbox}
```

The above link for testing in my content. When I reload the page the video appears but with some of the text from the above link visible. The html output reads:

```
;width=800&height=450&modal=1" rel="sexylightbox" title="Video">
YouTube video
```

Any thoughts? I have enabled all the plugins and made the Remote Content selection in the module.

If you use a WYSIWYG editor, switch it to plain text mode before inserting plugin code because WYSIWYG editors can add extra HTML code in design mode. If it doesn't help, it can be a problem if you use a 3rd party extension to embed YouTube videos. We can investigate this issue in more details if you provide a link to a page where we can see it and a temporary access to your J! backend by email.

OK thanks that fixed the problem. Last question for you is how to you create non-clickable thumbnails for the youtube videos? I want the user to see the youtube video in a small form and click on it for a larger video displayed in the lightbox.

PS: Unbelievably fast reply - thanks for the fantastic customer service! :)

Sorry, but the extension doesn't create thumbnails for YouTube videos. It only provides ability to show YouTube videos into the lightbox.
