
Lightboxing joomla youtube module

Posted by essic - 2012/02/06 19:05

Folks - We have a static div-based youtube module that we'd like to have sexylightbox display. Can you advise as to how we might achieve this? (joomla 1.6.3 stable)

Hello,

Could you provide a link to a page where we can see the module?

Regards,
ARI Soft

Do you want to show the video which is loaded by the module into into the lightbox when a user clicks by a link?

Regards,
ARI Soft

It is possible to use the next code for "System - ARI Sexy Lightbox Anywhere" plugin:

```
{arisexylightbox activeType="rcontent" width="290" height="230" url="http://www.youtube.com/watch?v=ciV6Uaeobxk" title="Video" bgColor="#000"}Show video{/arisexylightbox}
```
