nothing shows up
Posted by helloagain - 2012/02/09 16:43

_____

The module is loaded, but cannot see any user functions. Using Joomla 1.5

_____

Do you see nothing on module settings or mean something another? Is it possible to provide a temporary access to your J! backend by email and specify for what you want to use the extension so we can investigate an issue and help to configure the extension?

Regards,
ARI Soft

_____

You didn't describe what do you want to show in the lightbox so we configured it to show a content when a user clicks by a text link. Click by "SHOW THE LIGHTBOX" link on main page and the lightbox appears.

Regards,
ARI Soft

_____

Hello,

Documentation can be found in "Description" field on module/plugins settings page.

Regards,
ARI Soft
