
How to Display Image Gallery

Posted by jackibar - 2012/02/16 21:16

Just purchased and installed Sexy Lightbox but can't find how to display my image gallery! What code do I need to put inside my article to make it display the gallery? I have all the files in images/conversion folder. I have enabled all the plugins and the module.

Thanks for any help!

Hello,

You can use the next code for "ARI Sexy Lightbox Anywhere" plugin:

```
{arisexylightbox activeType="imglist" dir="images/conversion" thumbWidth="150"}{/arisexylightbox}
```

Regards,
ARI Soft

I inserted this code and now get this error:

Fatal error: Out of memory (allocated 67108864) (tried to allocate 10944 bytes) in /home/sidewalk/public_html/modules/mod_arisexylightbox/includes/kernel/Image/Asido/class.driver.gd.php on line 448

UPDATE: I figured it out that I needed to make my images smaller...

This error occur when memory is exhausted. You can use PHP Settings plugin to increase value of "memory_limit" PHP variable.
