
Getting Description to Show

Posted by jackibar - 2012/02/16 23:08

Okay, I was able to get the image gallery going and created the csv file with the Titles and made a column for Descriptions. The Titles are showing up properly - but the Descriptions are not displaying anywhere. How do I get them to show?

For example possible to show descriptions under thumbnails. For this set "Image gallery -> Simple gallery -> Title param name" to "Descriptions" (without quotes).
