Sexy Lightbox Anywhere shows the wrong image

Posted by chatfriend2001 - 2012/03/07 10:31

_____

Sorry for the inconvenience, but i've discovered another problem with the lightbox plugin:

I'm using Sexy Lightbox anywhere to display an image gallery, but the lightbox doesn't shows up properly.

Example

If you click on the first image, the lightbox opens with the loading bar, but it doesn't load the image.
Now if you click next it shows the first image but with the lightbox-size of the second image.

Best regards,

==

_____

Hello,

Set value of "Resize duration" parameter more than 0.

Regards,
ARI Soft

Ahh thanks!
I'm stupid.. I figured this out in the thumbnail-plugin but made the same mistake here again.
Thank you very much! Your support is great!
