
ARI Sexy Lightbox - In Article - Popup issue

Posted by yinbar - 2012/03/08 02:53

I created a test ARI Sexy Lightbox module and loaded it in a module position as well as loading into an article using this code: {arisexylightbox moduleId="80"}{/arisexylightbox}

The module position shows the popups correctly (on top of the article). However, the loaded in the article module (below) shows the popups in the same size as the thumbnails. How can I fix this problem?

Here is a link showing both the positioned module on top of the article and the same module loaded in the article below.

http://yehudainbar644.globat.com/_joomla173/index.php/getting-started#TB_inline?inlineId=asl4f5812239ba80&height=250&width=300

I am using Joomla 1.7.3

Thanks,

Yehuda

Hello,

Set plugin order of "ARI Sexy Thumbnails" plugin before other sexy lightbox plugins in plugin settings.

Regards,
ARI Soft
