Hi, I purchased ARI Sexy Lightbox package yesterday, have downloaded it successfully, enabled all plug ins and the module, set up the module (content bottom c) on the front page of my web site (Joomla 1.5), but now I don't have a clue about what I have to do (nothing seems to work). I wish to show select youtube videos which members or guest should be able to browse through by sliding through them. Can someone help me please?

Hello,

You can use the next HTML code for "System - ARI Sexy Lightbox" plugin:

Show videos

PS: If you use a WYSIWYG editor, switch it to plain text mode before inserting the code.

Regards,
ARI Soft
