Arisexylightbox inside imagemap ->Youtube-Videos

Posted by tmo - 2012/03/14 09:51

_____

Hello :)
i just purchased the arisexylightbox and now try to setup an article including an imagemap, where several areas of the image should link to several youtube-videos. but whatever i try, - i can't get it top work.
here's my test-code so far:

Unbenanntes Dokument

the first area with the linked image works flawlessly, but the "red" ones with flv-Video/youtube-link don't work. either the lightbox-frame show "404", or the lightbox-frame shrinks to simgularity and does nothing.

What am i doing wrong ?
Thanks and :)
