
autoplay?

Posted by ipunt - 2012/03/20 00:38

I've set the auto play to yes but still my vimeo video needs help to start.

what am I doing wrong?

Hello,

Download and upgrade "ARI Sexy Lightbox" module, clean browser's cache and use the next HTML code for "System - ARI Sexy Lightbox" plugin:

latest version of ari sexy lightbox is installed, cache is cleared but your suggested code gets me to 404 popup.

my previous code worked but only did not auto play.

Any suggestions?

Our code works fine on test server with the latest version of the extension. Could you provide a link to a page where we can see described problem and a temporary access to your J! backend by email so we can investigate an issue?

Regards,
ARI Soft

Try now.

PS: It didn't work because "ARI Sexy Lightbox Lite" plugin was used on your site instead of "System - ARI Sexy Lightbox" plugin.

Regards,
ARI Soft
