
Partially Working

Posted by verian - 2012/03/20 14:47

Hi, I have this partially working it seems. All Images with no links open, which is fine. I have Vimeo links opening ok. However, I've been trying to get a gallery from a folder (in an article) and it just shows the code I put in and no images. Any ideas.

Hello,

Could you provide a link to a page where we can see described problem?

Regards,
ARI Soft

I just tried it again, guessing I didn't paste text before as I now just get nothing.

```
{arisexylightbox activeType="imglist" dir="/images/"}{/arisexylightbox}
```

is what I put in the article, is that the wrong way to do it?
Forgive me if I struggle a little, I'm new to Joomla.

(link is here but there's nothing to see: <http://www.negativesoundinstitute.com/grid/index.php/feature/photography-section>)

Try to use the next code:

```
{arisexylightbox activeType="imglist" dir="/images" thumbWidth="100"}{/arisexylightbox}
```

And check that /images/ folder contains image(s). If it doesn't help, could you provide a temporary access to your J! backend by email so we can investigate an issue?

Regards,
ARI Soft

I don't have ftp at the moment to check folders but I will in a couple of hours and will report back, I am pretty sure there are images in there though.

Try now please. "http://www.negativesoundinstitute.com/grid/images/consumerism" was used as image path instead of "images/consumerism"

Thanks, I had tried the working one before I'm sure and had only put the full url in to see if it worked. No matter though seems ok now, thank you.
