
Required to click link 2 times to play YouTube vid

Posted by brunerandcompany - 2012/03/21 12:46

I'm having a small issue and can't figure out the solution.

I'm linking from an image to a YouTube video. When I click the image the first time, the lightbox comes up, but the video will not play. If I close the lightbox and click the image again, the video plays with no problem. Each time you reload the page, you must click the link 2 times for the video to play (click, close, click again). This issue is happening site-wide.

Here is an example: <http://72.3.205.114/club/membership-information>

Click the header image that says "play video"

Thanks in advance for your help!

Hello,

Set values of "Move duration" and "Resize duration" parameters more than 0.

Regards,
ARI Soft

That did it! Perfect!!

Thanks for the quick and accurate response.
