
Lightbox gallery from static photo

Posted by shoop29 - 2012/04/17 15:15

I'd like to display a graphic which when clicked on opens a lightbox photo gallery showing photos from a particular folder...

I can get it to display one specific photo, but not the series of photos from the directory.

Could you please send me the code to do that?

This is the generic code I have working currently:

Hello,

You can use "System - ARI Sexy Lightbox Anywhere" plugin, plugin code will look like:

```
{arisexylightbox activeType="imglist" dir="RELATIVE_PATH_TO_IMAGE_FOLDER" thumbWidth="75" type="customtext"}{/arisexylightbox}
```

Where RELATIVE_PATH_TO_IMAGE_FOLDER is a relative path to an image folder. For example if you want to show images from /images/photos/album1 folder, use the next code:

```
{arisexylightbox activeType="imglist" dir="images/photos/album1" thumbWidth="75" type="customtext"}{/arisexylightbox}
```

Regards,
ARI Soft
