
Flickr feed crashing template on 2.5

Posted by aka.andrew - 2012/04/25 09:18

Hi there

I am busy upgrading our web site to Joomla 2.5 from 1.5, using the Zephyr template from Rocket theme.

I have just purchased the latest version of ARI Sexylightbox, but when I try and run the Flickr feed of latest photos (as it was running on the same template for 1.5) it crashes the entire template. JQuery No Conflict is set to on, and the System - ARI Extensions plugin is activated.

Can anyone give me any help with this?

thanks

andrew

Hello,

Where we can see a problem?

Regards,
ARI Soft
