
How to prevent Scroll bars

Posted by rowby - 2012/06/01 14:35

Hi

This is an update to forum message
ARI Sexy Lightbox

When using the Article method of adding an item (rather than the Module method), the lightbox adds scroll bars and gets wider than the settings, adding scroll bars, horizontal and vertical.

It's hard to explain, but take a look here:
<http://stage.monsterdigital.com/test-rowby.html>

It's the video player about half way down the screen. There's a big play button, that activates the lightbox.

Is there a way to turn off scroll bars? When I was using the Module method I was able to avoid the scrollbars.

You can look at this page
<http://stage.monsterdigital.com/scrollbartest2.html> and click on shockproof and see no scroll bars.

Thanks !

Hello,

This problem with site template styles for component view. Add the next code before `<tag>` in `/templates/monsterdigital/component.php` file:

```
html
{
    margin-bottom: 0 !important;
}
```

```
body
{
    min-width: inherit !important;
    margin-bottom: 0 !important;
}
```

```
body .rt-container
{
    width: 100%;
}
```

```
body .rt-joomla .rt-article,
body #rt-mainbody,
body .rt-block
{
    margin: 0;
}
```

```
body .rt-joomla .rt-article-bg
{
    margin: 0;
```

```
padding: 0;
}
```

Regards,
ARI Soft

Wonderful! That fixed it :)

Thanks again and again and again!
