
Not showing in Chronoforms v4

Posted by nkellert - 2012/06/03 07:00

I recently installed the plugin and am creating a new form and am trying to use lightbox inside it.

First I am just trying to get it to work. I took your example.

Show ARI Soft site in popup

and pasted it into a custom HTML into a "custom html" element. The link shows up as it does on your demo site but goes to the actual page its linked to. No lightbox.

I tried reinstalling...turning the plugin off and on. Turning JQuery off and on. Still nothing.

Im using joomla 1.5.25. Here is the link to the published form.

http://test.kellertcreations.com/index.php?option=com_chronoforms&chronoform=Party_Quotation

Im kind of lost as to what to do. Id appreciate it. Get me some help and Ill be purchasing this today.

Hello,

"ARI Sexy Lightbox Lite" is a content plugin. Joomla! can use content plugins in articles only. If you want to use sexy lightbox in any content, you can be interested in "ARI Sexy Lightbox Anywhere" plugin from ARI Sexy Lightbox package.

Regards,
ARI Soft
