
External page won't load

Posted by timtenn - 2012/06/28 20:07

When I paste the example code for google into an article's html code, the lightbox pops up, but the content never loads.

Here's a link to an example on my page:

<http://logochairs.com/j25cms/index.php/product-lines/chairs/deluxe-chair-item-12>

Can you advise why this isn't working for external pages for me?

Google prevents loading of their site into , load another page.

Regards,
ARI Soft
