Link to external content from a module Posted by timcolman - 2012/07/04 10:57
I have an RSS news feed in a Coolfeed module and I'm trying to get the link to the full article to open in a Sexy Light popup (it's the paid version).
I've built rel="sexylightbox" into the tag but it's still determined to open in a new window/tab rather than the pop-up.
This isn't the first plugin I've tried (but it's the first I've paid for) and I just can't get it to work.
I'm sure I'm missing something simple, but I just can't see what.
Any ideas?
Thanks
Tim

Hello,
Where we can see the problem?
Regards, ARI Soft

the site is www.thesa-mag.com but it's "down for construction". Can I send you a log on privately somehow?
