
Loading Lightbox from a module issue

Posted by MitZ - 2012/07/06 14:45

Hello,

I'm developing a website without any navigation. There are three textboxes (text in 3 separate modules) which all have three links in them. Link one has to link to an article, link two has to link to a form (which could be a form loaded inside of an article) and link three has to link to a folder with several images.

I've bought Ari Sexy Lightbox but somehow or the other I can't exactly figure out how to link. I've made several attempts unfortunately not with the wanted result.

Also I've installed Ari Sexy link plugin, and specified the Elements CSS selectors. That gives me a lightbox but inside the lightbox the entire website is loading.

Could you please give me a hint were to start?

Fyi, this is the URL: <http://www.maisonmaison.nl/mm>

Looking forward hearing from you.

Best regards,

Ans

Hello,

Could you provide an image where we can see what links do you want to show into the lightbox? Currently it seems all links on the page are linked to home page.

Regards,
ARI Soft

Hello,

Please see the image, where:

- *A should link to a Joomla article
- *B should link to a folder with images (or image gallery...)
- *C should link to a RSForm Pro form or an article which loads the form

- *D should link to a Joomla article
- *E should link to a .PDF file
- *F should link to RSForm Pro form or an article which loads the form (different from 'C')

- *G should link to a Joomla article
- *H should link to a folder with images (or image gallery...)
- *I should link to a RSForm Pro form or an article which loads the form

Is this what you meant?

Regards,
Ans http://www.ari-soft.com/images/fbfiles/images/Afbeelding_3.png

Could you provide a temporary access to your J! backend by email so we can investigate the problem? It seems an incorrect HTML code is used for links.

Regards,
ARI Soft

We have configured "orange" module. If you have problems with other columns, let us know and we will help to configure them too.

PS: Clean browser's cache.

Regards,
ARI Soft

I've been following all actions (in front). This is exactly what I meant, thank you so much.

I'll try to figure out what you have done on the backend on the orange module, if I need help I'll surely let you know.

Have a great weekend (I will have one for sure! :)

Kind regards,

Ans
