What is this for - mod_arisexylightbox

Posted by timtenn - 2012/07/10 19:37

_____

I know how to use the plugin, but I don't understand what the module is or how to use it. I want to put a vimeo video in a module.

Further, I need the size of the lightbox to size correctly for desktop computer and for iphone viewing.

I have an image that will be the hyperlink to popup the video. For the iphone, it doesn't need to pop up in the light box at all actually, but rather just start playing the video when the image is clicked. On a desktop computer, I'd like the video to popup in the lightbox I purchased.

Can you point me in the right direction to achieve this?

_____

Hello,

You can read how to show a Vimeo video with help of "ARI Sexy Lightbox" module here.

Regards,
ARI Soft

_____

Thanks, that helped me to get the module working correct (almost). Please see this link:
http://logochairs.com/j25cms/index.php/product-lines/chairs/deluxe-chair-item-12

There is a problem on the top of the lightbox window (white bar across the top). How can I fix that?

_____

Set "Background" parameter in module settings to #000000 value.
