
playing vimeo on iphone

Posted by timtenn - 2012/07/10 21:27

How can I forego the lightbox when clicking the link from the module in the iphone, and just begin playing the video?
Mobile versions of the website do not have room for the lightbox to popup...and even if so, once you click "play" it opens the video in the default iPhone video viewer making the lightbox irrelevant.

Is there a way I can specify in the module to not use the lightbox if it's being viewed on an iphone?

Hello,

Sorry, but the extension doesn't support this ability.

Regards,
ARI Soft
