linking to slideshow pop up via icon

Posted by base - 2012/07/16 14:30

_____

i want a slideshow to open when an icon is clicked. This code doesn't work - can you tell me what I need to use to make it work so the slideshow opens when the icon is clicked?

{arisexylightbox activeType="imglightbox" dir="images/stories;images/slideshows/testfolder"}{/arisexylightbox}

thanks!

_____

Hello,

Use the next code:

{arisexylightbox activeType="imglist" dir="images/stories;images/slideshows/testfolder" type="customtext" thumbWidth="100"}{/arisexylightbox}

PS: Documentation can be found here.

Regards,
ARI Soft

_____

Almost perfect. Thanks!

There seems to be a line space above the icon now. If I change the activeType="imglist" to something other than imglist, that space goes (but the script doesn't work), so I'm thinking the space has something to do with the imglist css? If so, how can I change it so the icon lines up nicely?

Here's the sample (2nd movie down, slideshow)
http://skylightfilms.ca/movies/in-production.html

Also....
Is there a way to set it to autoplay and preload the next image while the current image is showing?

_____

will do, but my order was not cancelled.

Paypal via 2Checkout # 2W818017H3931594X
I just checked and the payment went through without a problem.

_____

Thanks. Regarding your questions:

1. Line space is added not by the extension, switch your WYSIWYG editor to plain text mode and remove

 HTML code (this code is added by edior) above plugin code.

2. Add opt_autoStart="1" parameter to {arisexylightbox} tag to start slideshow automatically.

Regards,
ARI Soft

LOVING this plugin! How can I get this video to play on the page when clicked rather than having to click the thumbnail then press play?

_____

Set "Auto play videos" parameter to "Yes" in "System - ARI Sexy Lightbox" and ""System - ARI Sexy Lightbox Anywhere" plugins settings.
