
Show images in lightbox (but no thumbs) - possible

Posted by Macjohn - 2012/08/04 22:42

I was hoping to use the lightbox for showing images - when clicking a link. - Not a thumb.

I put the images to be shown in the lightbox, in a div which I have hidden with display: none

Both link and images are inserted via a regular html module.

I have bought, and installed Sexylightbox - and installed sexylightbox anywhere plugin.

Both are activated.

how do I make this work?

You can see my testpage here:

www.fuk.popweb.dk

I want to show the hidden images from the div "fukFeatureboxBilleder" when clicked on "Se billederne". (see att: http://www.ari-soft.com/images/fbfiles/images/Sk_rmbillede_2012_08_05_kl.png)

Am I making sense? :-)

Can you help?

Thx

John

Hello,

Install, configure and enable "System - ARI Sexy Lightbox" plugin.

If it doesn't help could you provide a temporary access to your Joomla! backend by email so we can investigate the problem?

Regards,

ARI Soft

Still a problem.

I'll send you access to the test-site.

Thnanks!

"System - ARI Sexy Lightbox" plugin was not installed on your site (We installed it). Use rel="sexylightbox" attribute for tags instead of rel="sexylightbox" attribute to use images in one group.

Regards,

ARI Soft

Wow. That is weird!

When you asked me to install System ARI Lightbox, I thought I did that?!

Also - the address that you had access to is a copy of the site, from my local installation.

So when I wanted to do the same thing, locally - I checked and found System ARI Lightbox installed and activated. - But the lightbox did not work... odd?!!

I have made a copy of the site that you had access to, and installed it locally, so now it works.

However, I am a little uncomfortable not knowing what went wrong for me. It is bound to happen again, then...

I must be looking in the wrong place?! (but why do I find the correct name, then?)

Anyway - thank you very much. :-)

Try to check javascript error console on your local site. Probably it contains error(s) which help to find the reason of the problem.

ok - will do. Thanks

New issue:

Same test-site:

www.fuk.popweb.dkwww.fuk.popweb.dk

All three test-images has a title to the - but the first title is never showing in the lightbox?

My guess is that it is connected to the fact that I link to the first image, from a different anchor? - As I am linking from "Se billederne" - and not from the actual photo I am linking to... ?

Anything I can do about that?

Thx
John

Add title to tag which is used for the image which is called the lightbox.

Perfect! Thank you.

I thought I already tried that, - but I must have just tried to put the title on the IMAGE that calls the lightbox.

Thank you very much for excellent and fast support.

I am definately going to purchase more ARI products!

John
