
nothing displays

Posted by wrina - 2012/08/10 19:47

Hello to all.
Joomla: 1.5.26

I have used the sexy lightbox, without problems for some time.
I recently upgraded, Community Builder and Jevents Comps/Mods/plugins, then the sexy light box stopped working altogether.

Are there any known conflicts?? with the above coms/mods etc?

All the plugs-ins are enabled - pulls in the Link Text but there is not popup window.

Thanks for your help.
W.
