## Missing image - weird behavior

Posted by timtenn - 2012/10/01 18:38

---

When I have a link to a missing image on my site (using ari sexy lightbox), the box appears and does very strange things. It sometimes floats across the screen and then off the screen. When you click the "X" to close the window (if you can catch it), it just continues to pop back up. The box is blank, and there is no missing image 404 error. Any ideas what I could do to fix the behavior when images are missing?

Hi, thank you. You can see it at this link:  
<http://logochairs.com/product-lines/coolers/16-can-cooler-tote>

See image for how to see an example of a missing image. \

Be sure to search for the term "fight" <http://www.ari-soft.com/images/fbfiles/images/Capture-bfe1178221a9080edd63ed262fca82ae.JPG>

It's not doing the weird thing of running off the screen at the moment, but it is still doing weird things. How can I see a 404 missing image message?

Download and upgrade "ARI Sexy Lightbox" module. After this clean browser's cache. It should help.
