
NewsFlash articles in Lightbox

Posted by rudi72 - 2012/10/25 07:20

Hallo,

i bought the SLB yesterday to realize the following:

On template right position i have the modul newsflash with the introtext from about 10 to 15 articles.

Now i want that the article is shown in the lightbox, when you click on "Read more" button.

I also have two menu items with "category list" where all articles of a spezified category are listet.

How can i show a clicked article in a lightbox?

I have searched in the forum for houres and have tried some settings and plugins.

I want to point out, that my html and css knowledge is on a low level.

Please can you tell me step by step what settings or modifications i has to make?

Thank you.

Sorry, when my english is not so good.

WhoÂ'l finding writing errors, may keep them.

Hello,

Could you provide a link to a page where you want to use the lightbox and specify to what links do you want to attach the lightbox?

Hallo,

thank you for your quick replay.

My site is on

<http://www.imprisiko.eu>

The template ist the JSN_Decor_Plus.

Joomla is 2.5.7

The second and third item of the "Hauptmenu" on the left position are the category lists.

On the right you see the newsflash.

Regards Rudi

Disable "Content - ARI Sexy Lightbox Lite" plugin, install "ARI Sexy Lightbox" module (it is not required to enable it), install, configure and enable "ARI Sexy Links" plugin and set "Elements CSS selectors" parameter in plugin settings to the following value:

"LI.icon-sitelist A"|width=800&height=600&tmpl=component
"LI.icon-sitelist A"|width=800&height=600&tmpl=component
"#jsn-pos-right A.readon"|width=800&height=600&tmpl=component

Hi,

thank you, the flashnews is working well!!
(IÂ´m testing on an other site)
The two menu-items are not working as i want.
The list should come on a normal site.
Only the clicked article should come in the lightbox.

Is this possible?

Hallo, here iÂ´m back again.

A question about the flashnews.
Is it also possible, that the linked title also open the lightbox?
In the moment only the "Read more" button opens the lightbox.

Regards and thanks.

Replace the previous value of "Elements CSS selectors" parameter with the following value:

"#jsn-pos-right A.readon"|width=800&height=600&tmpl=component
".com-content .category-list .jsn-infotable A"|width=800&height=600&tmpl=component

It is not possible to attach the lightbox to titles of article in news flash because titles are not links.

Hallo, you are great!!

The menuitems now working perfectly!!!

Exactly what i wanted.

The newsflash is working correct with the "Read more" button.

What iÂ´m not understanding is, that the linked titels of the newsflash are not able to be opened with the lightbox.
In the categorylist also only the titels are linked and they can be open in the lightbox.

Maybe my thinking is stupid. I told you, i am a beginner in css and html. But iÂ´m only thinking logical.

Regards.

Are titles in news flash links? Titles are links in category list so it is possible to attach the lightbox to them.

Hello all,

i think, i have solved the problem by my self.
the code i us is:

```
"#jsn-pos-right A.readon"|width=800&height=550&tmpl=component  
".com-content .category-list .jsn-infotable A"|width=800&height=550&tmpl=component  
".jsn-mod-newsflash .contentheading A"|width=800&height=550&tmpl=component
```

Now also the linked titles of the newsflash module opens the lightbox.

Now all is working how it should.

Thank you all for your help.

Ps: only themes black and white and Spanish black and white are working. With other themes i get the normal sites.

We can investigate the problem with themes if you provide a link to a page where we can see it.

PS: It seems we discussed about different titles.

Hallo,

excuse me, everything is working.
Maybe it was a problem of the cache.

But i have an other question:

iÂ´m using YoutubeGallery and in the past together with the sexy lightbox light.
It was working well.
In the gallery i had to set the folowing parameters:

Rel option to apply any shadow/lightbox : sexylightbox
Href addon : &TB_iframe=true&width=600&height=550

When i now disable the lightbox lite then the lightbox is not more opening.

What settings must i make with the full version of sexy lightbox?

You can use "System - ARI Sexy Lightbox" plugin instead of "ARI Sexy Lightbox Lite". It supports all features which is provided by "ARI Sexy Lightbox Lite".

I have activated this plugin.
But what settings in YoutubeGallery must i use, that the Gallery is using "System-ARI Sexy Lightbox" ?

For the "Content-ARI Lightbox lite" the settings are:

Rel option to apply any shadow/lightbox : sexylightbox
Href addon : &TB_iframe=true&width=600&height=550

What are the settings for "System-ARI Sexy Lightbox" ?

Hallo, good morning.

On my test-url the lightbox is now not more working!!
I have deinstalled the Lightbox lite and aktivated all other plugins of the full version.
Exept the module.
Either the YoutubeGallery nor the menu-items and newsflash using the lightbox now.

What's going wrong?

"ARI Sexy Links" plugin works fine for us on your site. Try to clean browser's cache.

About YoutubeGallery, could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the issue in more details?

Sorry about my writing mistake.
It should be:
Neither the YoutubeGallery nor the menu-items and newsflash using the lightbox now.

Hallo,

i think you have looked at my original site.
There the Lightbox lite is still installed and aktiv.

Open "ARI Sexy Links", "ARI Sexy Lightbox" and "ARI Sexy Lightbox Anywhere" plugins settings page, set "Include jQuery" parameter to "Yes" and re-save plugin settings (even if the parameter has been already set to "Yes"). It should resolve the problem.

Ok, i have done.

The two menu-items are working now.
Not so the newsflash and the YoutubeGallery.
At the menu "online Videos" only the thumbs is shown when you click on it.

Now i have cleaned all cache and have made a global checkin.
Two items where not checked in.
Now the newsflash is working.
But not the YoutubeGallery!

"rel" attribute for YouTube videos is set to "arisexylightbox" value, but it should be "sexylightbox"

Oh, iÂ´m sorry.
Yesterday i have made some trials, so also wiith "arisexylightbox" and forgot to set back.
Now the three videos on top of the homepage are working well.
But all vids in the menu "online Videos" are not working.

We had the same idea.
This it is.
When i deactivate the thubnail plugin, then it is working.

Thank you very much!!!!!!!!!!!!

Now all is working how i want!!!!!!!!!!!!

Problems solved!!!!!!!!!!
