How to change the position of the light box
Posted by Gardennorm - 2012/11/19 11:34

_____

Hi,

Im using the lightbox anywhere plugin but when I resize it, the top of the lightbox disappears off the top of my page.
Does anyone know how to reposition the lightbox so it remains in the center of the page.
Ive gone through the plugin setting but cannot see anything that will reposition the lightbox
The link can be seen towards the bottom of my home page aegeanescapes.com

Thanks

_____

Hello,

This conflict with site template styles. Add the following CSS rule to a site template CSS file to resolve the problem:

HTML BODY
{
 position: static;
}

Worked a treat!
Many thanks :)

_____

Hello,

I'm having the same problem and tried the solution suggested, but it doesn't seem to be working for me. I'm not an expert on CSS and I might not be placing the rule in the right context.

I'm using the beez_20 template and added the rule to the template.css and template_rtl.css files. I copied and pasted just as shown, pasted only the items in braces as their own section, and pasted just the rule within the "body" tag. None of them worked. I'm certain I'm putting it in the wrong context.

Below is the content of my template.css file. If this is the right file to modify, can you tell me where I should be putting the rule?

Thanks in advance for your help.

body
{
     background: #fff;
     color: #000000;
     font-size: 100.1%;

```
      padding: 0px;
      text-align: center;
}

body.contentpane {
   width:auto;
   margin:10px;
   text-align: left;
}
img { border: 0 none; }
```

_____

Hello,

Where we can see the problem?
