
Background color

Posted by redgarfield - 2012/11/23 08:40

I want to change the background color of lightbox because some of the images I use have transparant parts in it.

Now I want to change the background color to white. When I use the parameter of the plugin and set it to white, then nothing happens.

There is no background color.

How can i change the background color of the lightbox?

Peter

Hello,

Could you provide a link to a page where we can see the problem and specify what plugin do you use "ARI Sexy Lightbox" or "ARI Sexy Lightbox Anywhere"?

Regards,
ARI Soft

You can see it on <http://www.classic-rally.info/item/10-legend-of-the-fall-2012>

I'am using ARI Sexy Lightbox.

Add "background=#fff" request parameter to a link to a large image. For example, if you use the following HTML code:

modify it in the following way:

Thanks, this works.

What also works is this (after trail-and-error):

```
#SLB-Background {  
    background-color:#fff !important;  
}
```

I put it in my template.css.
