## Vimeo and iPad

Posted by zucci2 - 2012/12/14 03:18

---

I have the ari data table working well in my client's site so I am very interested in the Ari Sexy Lightbox.

My client has many videos to share with students and parents at many high schools in the country.

- a. All are hosted on Vimeo for performance purposes.
- b. We want to build simple lists of videos linking each of the video titles so that, when clicked, a lightbox is opened to display the appropriate Vimeo video atop the page.
- c. The lightbox needs to work with iPad and mobile devices.

I think your demos and what I read are affirming this for me, but I was not clear on the iPad platform. I would just like to ask before buying.

Thank you for such great products. They are worth the price.

Hello,

You can see the extension in action on demo site. You can also check it on iPad that it is suitable for your needs.

Regards,  
ARI Soft
