## Show lightbox automatically when page is loaded

Posted by kbrooksilm - 2012/12/15 03:49

---

How do you show a lightbox automatically when page is loaded? I want it to play a mp4 video when a certain page is loaded, then auto close and show the content of the page.

The page I want it to load after it plays is <http://www.enorthside.org/index.php/ministries-83/jamcity>

The video is located at [http://www.enorthside.org/images/stories/JAM/Jam\\_City\\_Logo\\_Reveal.mp4](http://www.enorthside.org/images/stories/JAM/Jam_City_Logo_Reveal.mp4)

Hello,

If you use "ARI Sexy Lightbox" module, configure common module parameters so it is shown on necessary page(s). Set "Open on load" parameter to "Yes" or "Only once" (if you want to show the lightbox only once). Enter when the lightbox should be closed in "Auto close delay" parameter. Set "Choose type" parameter to "Remote content" and enter a link to a video in "Remote content -> URL" parameter. Leave "Remote content -> Link text" parameter is empty.

Regards,  
ARI Soft
