Remove Scroll bars?

Hi,

I am currently using Sexy Lightbox Anywhere to display MP4 content which linked on an article.

Is there a way to remove the scroll bars on the right side and bottom of the lightbox?
If possible, I would like to have the lightbox frame be larger than or equal to the video.
As it is right now, regardless of the height and width specifications, the flowplayer controls always reside below the bottom scroll bar.
I am using the standard white theme.

Thanks!

Hello,

Where we can see the problem? It can be a conflict with site template styles.
