# How do I make border width uniform on popout?
Posted by blackwednesday - 2013/02/19 20:27
_____

Hello,

 We do not wish to utilize the additional space at the bottom of out lightbox window. How can I make the bottom border the same width as the top and the sides?

Thank you in advance!

Hello,

Space at the bottom is reserved for description and it is not possible to remove it.

Regards,
ARI Soft

Hi,

 Thanks for the fast reply.

Ok, where would I go to add a description? Would I need to edit the Elements CSS selectors of 'ARI Sexy Links' somehow? Or would there be a simpler way to actually add the descriptions?

Thanks!

_____

Use the following code in "Elements CSS selectors" parameter:

"LI.ux-menu-item114>A"|width=800&height=600&title=Test title
