
Lightbox - K2 Slider

Posted by raphalitos - 2013/02/20 07:51

Hello everyone

first of all, thank for your great extension which is working great so far.. however I would love to use this feature with a few links on my startpage. On this startpage I also have the K2 Slideshow plugin installed and now as soon as lightbox plugin is active, the slideshow shuts down its functionality..

any help would be highly appreciated.. if it helps, please have a look at <http://www.test-bcreative.ch/>

Hello,

This problem with slider, it can't work properly when several jQuery instances are loaded and it doesn't use K2 copy of jQuery (it has \$K2 alias). It can be fixed in several ways:

1. Slider's developers fix their slider (it is easy it is just requires to use \$K2 instead of jQuery).
2. Disable jQuery loading in K2 and "ARI Sexy Lightbox" and load it with help of a 3rd party extension (for example "JS Plant" plugin can be used for this purpose).

Regards,
ARI Soft

hii team ari-soft

thank you so much for getting back so quickly.. woow.. even I will see if I can fix the problem by myself changing the value's of the slider.

thx again,, you guys rock.. keep it up
