Hello,

Set "Include jQuery" parameter to "Yes" in plugin settings.

Thx for quick answer. This setting is already set to "Yes": [http://www.ari-soft.com/images/fbfiles/images/2013\\_03\\_06\\_140935.jpg](http://www.ari-soft.com/images/fbfiles/images/2013_03_06_140935.jpg)

jQuery is not loaded on your site. It can be removed by a 3rd party extension. We can investigate the problem in more details if you provide a temporary access to your J! backend by email.
