
Only works on \"home\" page

Posted by cleck673 - 2013/04/17 19:01

I have an external url in my menu using the following as the URL:

`http://www.EXTERNALURL.com?TB_iframe=true&height=715&width=1030" rel="sexylightbox" scrolling="no" title="TITLE"`

When I am on the home page of the site, it works fine.

When I am on any other page, it does not. It just opens the URL direct.

I checked the source and the calls are on all pages.

Thanks

=====

Hello,

Where we can see the problem? It can be a javascript conflict with a 3rd party extension.

Regards,
ARI Soft
