## Flickr photos not displayed anymore

Posted by Arnstein - 2013/05/12 20:51

---

I'm using Joomla 1.5 and calling the ARI Sexy Lightbox plugin from articles to display single Flickr images as I've always done. Only now the images does not appear - not even on the old articles that has always worked.

I'm using the string: "{arisexylightbox activeType="flickr" type="flickrimage" source="photoset" thumbSize="small" photosetId="xxxxxxxxxxxxxxxxxxx" photoid="xxxxxxxxxxx"}{/arisexylightbox}", but all the browser shows on the web-page is "{\$data:sexyimage}".

Any ideas..?

Hello,

Could you send plugin code which you use by email so we can investigate the problem?
