
Show html external not work

Posted by troken - 2013/06/01 18:36

Hello

In this page, test show html in external content, but not work code.

Ver mapa completo

Can you see in <http://www.cpereira.com/web/principales-clientes-cinematografia-pereira-en-la-peninsula>

Thank you very much for your help

Hello,

Check that "ARI Sexy Lightbox" module is installed, "System - ARI Sexy Lightbox" plugin is installed, configured and enabled and also set "Mode" parameter in the plugin settings to "Anywhere" value.

Regards,
ARI Soft

Thank you, work correctly
Is possible not show scrollbars?
Thanks again

Increase values of "width" and "height" parameters in HTML code for the lightbox because the page which you want to load is more than 805 x 660. Set "width" to 970 value and "height" to 670

Regards,
ARI Soft
