
Slideshow

Posted by ITeXXion - 2010/05/09 10:33

Hi,

Is it possible to add a slideshow (play/pause) option to the Sexy Lightbox. Right now you have to press the 'next' and 'previous' button all the time.

Thanks for any help

Hello,

It's a good feature and we'll implement this in a future release. We suppose this will be available within 1 week.

This would be grate!

I can wait a week :)

Thanks!

Slideshow functionality is available in the latest version of 'ARI Sexy Lightbox' (v. 1.3.4). You can download the latest version of the extension in 'Member Area' on our site.
