
Overlay color in Lightbox Anywhere Plugin

Posted by zator79 - 2010/05/19 20:59

Hi,

Is it possible to modify the background color (fade it out) when the pop up window is shown? I've seen similar effect in Overlay in JQuery Tools.

I use the Lightbox Anywhere Plugin to show pop-up videos and it works great, but the entire page is quite colorful and it distracts visitors watching the video.

Hello,

We have updated the extension. Now it provides new parameters 'Overlay color' and 'Overlay opacity'. It helps define necessary overlay color and opacity. You can download new version of the extension in 'Member Area' on our site.
