
YouTube double audio in Chrome after light box

Posted by bowman9991 - 2013/08/09 00:06

Hi,

I have an ARI Sexy Lightbox module that pops up with standard YouTube embed code (iframe). The Lightbox module loads a Custom HTML module with YouTube embed code inside it. When I play a video in Chrome, it pops up and plays fine, but when closed, the audio starts again in the background a couple of seconds later.

You can see it here: www.visionsuper.com.au (bottom right hand corner videos).

The light box module is set to auto play. However, the video won't auto play unless I add the code "?autoplay=1" to the YouTube URL.

Is there any way I can get the audio to stop repeating AND make the videos auto play too?

Thanks,

John

Hello,

Home page doesn't contain "ARI Sexy Lightbox" extension.

Regards,
ARI Soft

It does. Just click on one of the images in the bottom right hand corner! They will lead you to these two pages:

<https://www.visionsuper.com.au/super/transfer-my-super/transfer-your-super-video>
<https://www.visionsuper.com.au/super/insurance/insurance-video>

Video starts to play automatically on our side. We have checked it in FireFox and Google Chrome browser.

About issue with audio on background. Load content into an article and then load the article into the lightbox instead of loading inline content.
