
Lightbox Moves Viewed in Internet Explorer 8

Posted by stantaylor - 2013/08/16 19:44

I installed Sexy Lightbox on a Joomla 2.5.14 site. I'm using it to display Joomla articles. The lightbox displays fine in Firefox and Internet Explorer 9 and 10. In IE8, the box moves around. Moving the mouse pointer affects it somehow. Is there something I can do to stop this behavior?

Thanks.

Hello,

Could you send a link to a page where we can see the problem?

Regards,
ARI Soft

Thanks for the reply. Here's my page--> [My Page](#) Click 'Profile' to see what's happening

This happened on a Windows XP machine.

Add the following CSS rule to a site template CSS file:

```
HTML BODY {height:auto;}
```

Thanks. I did what you said, but the behavior doesn't change. However, I clicked "Compatibility View" and the problem went away. I also tried it on a similar computer at my office and it was okay. Maybe it's just something with this particular machine. Unless you want me to try something else, I'm okay. I really appreciate the help.

Clean browser's cache on machine where the problem occurs. It should help.
