
Anywhere plugin doesn't work, tags in article, t3

Posted by gnammyx - 2013/08/20 20:53

Hello,
I'm using Joomla 3.0 and I've installed only the Anywhere plugin for doing some testing.
I pasted the tags {arisexylightbox} like the documentation shows, in the article where I want to test the plugin. The formatting was ok, in plain text editor.
The problem is, when I open this article by the menu in the browser, the page remain blank, the site doesn't work. The page source shows me nothing, a completely blank page. Other pages works.
This particular article with the tags works only if the plugin was disabled.
My template is a t3_blank template custom modded, based on T3 Framework and bootstrap

Thanks in advance
Gianmarco

Hello,

Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

Try now please. The problem occurred because "ARI Sexy Lightbox" module was not installed. Installation of "ARI Sexy Lightbox" is described here.

Regards,
ARI Soft

Oh excuse me for this trouble, in order I think the plugin was standalone without the module.
Sorry for my misunderstanding!
Thanks a lot for quick reply!

Regards
Gianmarco
