switch off / simple animation

Posted by StefanS - 2013/08/31 06:30

_____

Hi,

I would like to switch off all animations when opening a vidoe-box or only have the lightbox smoothly zoom in from the center.
How do I have to set the parameters?
Where do I find a documentation of all the animation related parameters (they aren't 'self explaining' for me at all).

Thx,
Stefan

_____

Hello,

Find the answer here.

Description of common module parameters is here.

Regards,
ARI Soft
