
Ari Sexy lightbox plugin - parameters - one pic?

Posted by richardball - 2013/09/04 10:25

Using the module, I can have a slideshow which has just one pic visible to begin with, eg:

<http://www.hps-norfolkandsuffolk.org.uk/demo25/index.php/events/events-past/201-gressenhall>

Is it possible to do the same with the plugin?

Your instructions say that the same parameters apply but I have tried various combinations of the Module parameter 'Visible items count' without any effect on the plugin.

Thanks,

Richard

Hello,

Use the following plugin code:

```
{arisexylightbox activeType="imglist" dir="images/stories/gressenhall2013" thumbWidth="300" type="gallery"
visibleItemCount="1"}{/arisexylightbox}
```

Regards,
ARI Soft
