Apply the Code - Where?

Posted by Internaut - 2013/11/14 21:01
_____

Like some, I have 'Lightbox Anywhere' working just fine on one site, but the upgrade now to Lightbox doesn't seem to look the same.

It's great this site has a wide variety of code examples - but my question is, where does one paste the code?

Example:
I have a small Joomla (2.5) article and in html mode enter the code, then save, but the code shows up as text in the paragraph.

It's one of those Joom user positions that contains the article, and I wish to place a link that will open either the rest of the article, or another article.

The docs also provide the example codes, and instructions on what to do with the code, but not where to paste it.

Hello,

Plugin code should be placed in an article (or other content) where you want to use the lightbox.

Check that "ARI Sexy Lightbox" module is installed and the plugin is enabled. If it doesn't help, provide a link to a page where we can see the problem.

Regards,
ARI Soft
