
how to insert a slideshow in a article

Posted by prince25 - 2014/01/05 18:26

Hi,
i have bought and installed ARI Sexy Lightbox and i am a joomla beginner.
i ask you helping me.
i would know how to insert a slideshow of pictures in a joomla article, preciously i would insert two slideshow with different pictures in two joomla different articles.
Can you write me the steps that i must follow and the syntax that i must insert in joomla article text css?

thanks.

Hello,

Could you explain in more details what slideshow do you mean? "ARI Sexy Lightbox" is a lightbox extension, it is not a slider. You can see the extension in action [here](#).

Thanks for your fast answer.
For "slideshow " i meant to realize in a joomla article a pop-up of pictures as in the example of cars in your url.
but i want to activate this pop-up with pictures collected in the directory not visible individually in the article. in this way the visitor of the site can view these pictures only through this pop-up of pictures. and i want that this pop-up is available with a click on it.

thanks.

You can use "System - ARI Sexy Lightbox Anywhere" plugin for this purpose. Documentation for the plugin and sample plugin codes are available [here](#). If you need more assistance, let us know.

Hi,
i have read the user guide for Ari Sexy Lightbox Anywhere.
I have inserted the following text

```
{arisexylightbox activeType="imglist" thumbWidth="125" dir="images/Articles/photos"}}{/arisexylightbox}
```

i have inserted this text in html in a joomla article.
but in the site the pop-up of pictures doesn't work, in fact the previous text appear.
what's the matter?

thanks

Your plugin code is incorrectly and it doesn't look like in your previous post. It is:

```
{arisexylightbox activeType = "imglist" thumbHeight = "100" dir = "images/Articoli/Mercatino" {/ arisexylightbox}
```

Use the following one:

```
{arisexylightbox activeType="imglist" thumbHeight="100" dir="images/Articoli/Mercatino"}}{/arisexylightbox}
```

PS: Check also that "System - ARI Sexy Lightbox Anywhere" plugin is enabled.

It works.

:cheer: Thanks!!!

it works, but i would to do faster the view of images in the pop-up.

1. is it possible to modify the size of Window pop-up images? i know modify only thumbnail size.
2. if it is possible, how do i have to do?

3. if it is possible, do i do the Window pop-up faster?

thanks

1 and 2. The extension shows original images into the lightbox, it doesn't provide ability to show modified images into the lightbox.

3. Could you explain in more details what do you mean? Do you want to decrease duration of animation and transition effects or mean something another?

thanks for the fast answer.

i would reduce the time of loading of single image into the lightbox.

can you say me some advice about the size (mb, pixel..., size, etc) of the photos in order to do faster the loading of the single images?

thanks a lot.

Images are loaded by browser. They are loaded faster if have a small file size.
